CHECK YOUR GUARD PART NUMBERS for CONVIO-SERIES headers

The Lexion F535 uses 38ea WND-004 H-3 Clip and 38ea K11-001 C-2 Clasp

For all headers 45' wide and wider, ABM requires the use of the ABM-2005 Grain Saver Boots on every other point

Claas FG-1530 uses 1ea 6-point milo guard modified from a 7-point guard, kit will have 26 sections

The 6-point ABM milo guard has part number FG-067 for purposes of service requirements

Claas FG-1530 and FG-1380 kits includes clip mounting hardware

Claas FG-1530 kit is designed for the "short" guard points P/N's 05212822 and 05212812, CHECK guard part numbers !

Claas "long point" combine sickle guards 05212800 and 05196000 require the JDF-010 C-clasp and the WND-103 H-4 clip

To Select Clips and Clasps for Challenger/Lexion/Claas Combines, please call us with your guard part numbers, guard bolt diameters and any special guard configurations

ABM-2005	GRAIN SAVER BOOT	\$8.88
FLX-HC-3	HOG RING	\$0.26

All of the Set #'s listed above have been proven to work
on the brands and header widths shown

Because Guard Part Numbers and OE-Guard Suppliers change frequently,

We recommend that you help your dealer specify a correct set of Milo-Guards for your machine

Please have this information when you contact your dealer

Guard part number or part numbers used on your machine

Model Number and cutting width

Main guard point spacing (usually either 3" or 4")

Guard bolt diameter, usually either 3/8", 7/16" or 10mm diameter

Brand Name--some headers are "private labeled" for major OE Brands

We will assist you in the selection of a full set of milo-guards or replacement

parts as needed so that you can get back in the field and start saving grain !!

WARRANTY: ABM will replace any part it manufactures that proves to be defective

for a period of one year from the date of purchase. ABM is not responsible for

damages cause by improper installation or misuse of its products nor is ABM responsible

for any consequential damages to combines or headers.

shieldag.com

800-798-1968

Schumacher EasyCut does not make headers. They make a world-class cutting system retrofittable to most modern combines. Therefore, ABM recommends that your farmer/customer goes back to the original fitup method for Milo Guards. COUNT the number of exposed guard points. Charts show options for header widths based on the number of exposed guard points. When cutting Sorghum (Milo), we recommend that Flex headers are "locked out" in the rigid position.

All OEM Headers equipped with Schumacher EasyCut SCH guard and sickle cutting systems
