

# Shield Disc Sealer

## For Ammonia (NH3) Toolbars

- Heavy-duty construction with greasable tapered roller bearings in all joints
- Extra holes and slots in the arms, allowing the user to “crowd the knife” or turn blades around backwards—any adjustment needed for different soil types or conditions
- “Stepped slots” in the blade hub allow for use of just about ANY sealer blade on the market today. Hub will accept any standard 3/8, 7/16 or 1/2” blade hole pattern, and any standard sealer blade up to 18” in diameter
- 3-mounting U-bolts to assure that the unit stays tight on the shank, and Shield stocks U-bolts for Shield Shanks (1 X 2 or 1-1/4 X 2 shanks) or “edge-on” shanks
- Service parts IN-STOCK

## Easy Ordering:

KSC-441100 is a **complete kit** with 2ea 18” Notched blades and U-bolts for Shield Shanks, or **BUILD YOUR OWN:**

KSC-441072 Sealer upper and lower arm complete, then add:

- o U-bolts for your shanks

**KSC-666460** Rolling Basket with CONVEX ("pumpkin") basket

**KSC-666461** Rolling Basket with CONCAVE basket

## For Strip-Till and Conventional Bars

- Installs on any 1 X 2 or 1-1/4 X 2 "Flat Way" shank
- Low-draft—unit just "trails" the shank without adding load
- Works in conjunction with any standard disc sealer system
- Smooth and form your berm for optimized wintering and spring planting
- Improves seed-to-soil contact during planting season
- Assists in sealing fertilizer products in the ground
- Choice of Berm-builder baskets—concave or convex, **YOUR CHOICE**
- Transport lock to minimize damage while roading

**KSC-666460 with Convex "pumpkin" basket**

**Perfect Shaping and Soil Control!**
